## NEW E-MAIL ENCRYPTION SOFTWARE FROM TROY FIRM

Posted on 2/3/2008 10:21:31 AM

Troy-based Pure Entropy Technologies LLC last week released its e-mail encryption software, encryptoMail, through its sister company, Encryption Security Solutions LLC.

The company said the release offers easy encryption and decryption of e-mail, and is an improvement over traditional e-mail encryption programs, which are difficult to use, slow to execute or unable to process certain forms of data accurately.

"What makes encryptoMail so exceptional is its ability to handle all forms of digital data seamlessly and without errors, and beyond that its ease of use and simple installation set it apart from the competition," said CTO Ramie Phillips III.

In server applications, encryptoMail requires very little system overhead and minimum maintenance. This encryption software works with Microsoft Outlook 2003 and later versions.

Introductory pricing starts at \$50 per seat for a three year license. Enterprise pricing for high volume users can result in prices as low as \$35 per seat. And members of Automation Alley receive a member discount of 10 percent.

Founded in May of 2006 by three Michigan entrepreneurs the stated goal of Pure Entropy Technologies, LLC is "To provide unprecedented encryption security, efficiency, and performance to our customers so as to ensure that their critical information is secure."
