

# PURE ENTROPY TECHNOLOGIES/ENCRYPTION SECURITY SOLUTIONS, LLC ANNOUNCES RELEASE OF ENCRYPTOSAFE™, A GAME-CHANGING FILE ENCRYPTION PROGRAM

---

**ORION, Michigan - Pure Entropy Technologies/Encryption Security Solutions, LLC has released its much anticipated encryptoSafe™ program for distribution and sale to the commercial and retail market.**

Its release heralds a new era in easy-to-use encryption/decryption of documents and files for storage and/or transmission via email. With the tremendous increase in sensitive information being lost or stolen from laptops or other storage devices and/or through transmission across the Internet has come the increasing realization that privacy and data security are now of paramount importance. Traditional encryption programs are difficult to use, slow to execute and are generally unable to process certain forms of data accurately. The encryptoSafe™ program changes all of that.

"What makes encryptoSafe™ so exceptional is its ability to handle all forms of digital data seamlessly and without errors" stated Chief Technology Officer, Ramie Phillips, III. It is compatible with any digital format including video, audio and alphanumeric." "Beyond that its ease of use and simple installation set it apart from the competition. encryptoSafe™ will allow the user to safely store sensitive data on their hard-drive or transfer it via the internet using any e-mail program." From a technical standpoint, encryptoSafe™ requires very little system overhead and minimum maintenance.

The encryptoSafe™ program is a very affordable solution with introductory pricing for a three year license on a per seat basis. Enterprise pricing for high volume users is also available.

About Pure Entropy Technologies/ Encryption Security Solutions, LLC:

Founded in May of 2006 by three Michigan entrepreneurs whose stated goal is "To provide unprecedented encryption security, efficiency, and performance to our customers so as to ensure that their critical information is secure". The company's cutting-edge technology places them in the forefront of currently available encryption systems. Pure Entropy services the military/governmental markets.
