You can gain full ITAR Compliance within (typically) one week. Contact the ITAR Compliance Leaders today!

Who Must Be Compliant?

Manufacturers of data or items (whether or not it is exported) AND those furnishing defense services for defense use

Any manufacturer that has a product on the USML (United States Munitions List)

The U.S. Government views the sale, export, and re-transfer of defense articles and defense services as an integral part of safeguarding U.S. national security and furthering U.S. foreign policy objectives. The Directorate of Defense Trade Controls (DDTC), in accordance with 22 U.S.C. 2778-2780 of the Arms Export Control Act (AECA) and the **International Traffic in Arms Regulations (ITAR)** (22 CFR Parts 120-130), is charged with controlling the export and temporary import of defense articles and defense services covered by the United States Munitions List (USML).

All US manufacturers, exporters, and brokers of defense articles, defense services, or related technical data, as defined on the USML, are required to register with US Department of State. As stated in ITAR 122.1 manufacturers who do not engage in exporting must nevertheless register. Registration is primarily a means to provide the US Government with necessary information on who is involved in certain manufacturing and exporting activities. Registration does not confer any export rights or privileges, but is a precondition for the issuance of any license or other approval for export.

Encryption Security Solutions is your guide and resource to ITAR Certification. Let us perform an assessment on your organization then provide you with a Compliance Manual and personalized training to help guide you into compliance. Call us for more information and schedule your assessment.
