

Encryption Security Solutions

encryptoDrive™ Best in Class Security Products

In today's world, everyone struggles to keep their information safe from unauthorized access. encryptoDrive™ (eDrive™) technology delivers automatic encryption of all sensitive data including local and domain credentials, temporary files, folders and paging files without affecting system performance. If your laptop, desktop or tablet PC is stolen or lost, eDrive™ secures, then prevents unauthorized access to your data.

Security, Manageability and Flexibility. With encryptoDrive's™ Policy Manager, a security administrator can easily establish and enforce policies governing the application of encryption. The Directory Manager allows you to choose which Directories should be encrypted. eDrive's™ Key Manager provides the flexibility to Create, Copy, Revoke, Recover and choose an Authentication process.

encryptoDrive's™ 256 bit encryption was designed to overcome employee resistance by making the encryption process transparent for the end user and will ease adoption.

encryptoDrive™ Highlights

- Automatic Protection for all sensitive data
- Encryption is transparent to end user
- Policy, Directory and Key Manager
- Keys generated by pseudo number generator
- Key can be password locked by administrator
- Dual Authentication with pre-boot USB Key and password
- Single Password Sign On without pre-boot authentication
- Data Recovery in case of lost key or password
- Installer simplifies installation and implementation
- Display notifications provided from encryption driver
- Proprietary 256 Bit JUMBLE™ Encryption Engine
